

## About our client

We have implemented the Crownpeak for multiple clients all over the globe. Our client list includes top leading pharmaceutical companies, banks, insurance agencies etc.

Crownpeak is the only cloud-first Digital Experience Management (DXM) platform with built-in Digital Quality Management (DQM), ensuring rapid deployment of high-quality digital experiences.

## Scope

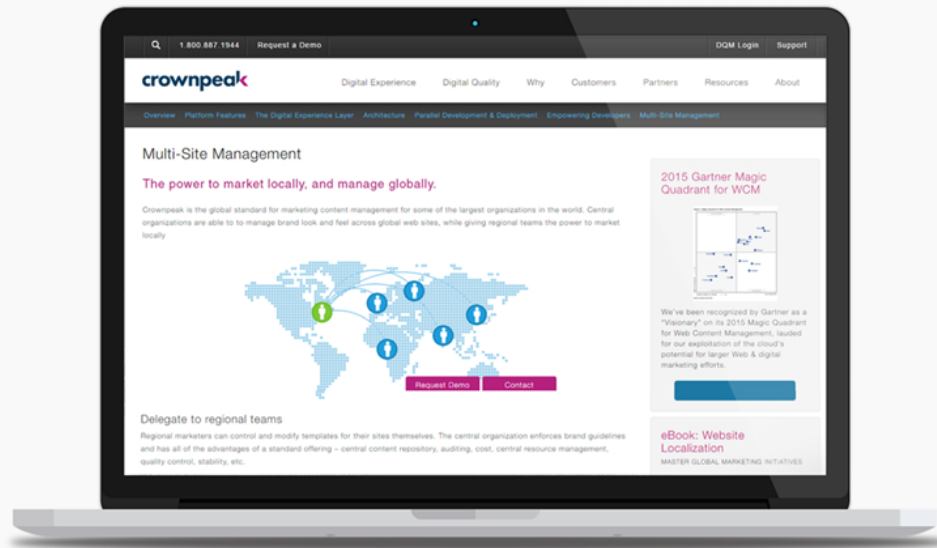

We can manage all the contents of a website including images, videos, document files etc. We can manage the visual layout and predefined the structure. Using CrownPeak we can make changes and add content easily. We can predefine the characteristics of the text, images, and videos like the format, size, font for text etc. Crownpeak makes managing websites simple and consumes less time.

## The problem

Creating a website to support Multiple languages.  
Develop multiple websites using the same framework.  
Managing content and maintaining the existing websites.  
Publish and access the websites within the defined workflow.

## Solution

Crownpeak is the global standard for marketing content management for some of the largest organizations in the world.  
It comes with an integrated translation management framework for multi-site and multi-language management.  
It ensures that content is continually managed within the defined workflow.

## Results

A content management functions from content delivery and allowing content in any format to be deployed into any environment is implemented.
